bers. The best hygienic and most per-
fectly ventilated shop in the Back Bay.

WIRELESS SOCIETY

Mr. H. J. Power Describes Erection Of Tower At Medford.

Yesterday afternoon several mem-
bers of the Wireless Society listened
to a talk by Mr. H. J. Power of Tufts
College. Mr. Power is at the present
time vice-president and general man-
ager of the Atlantic Radio and Re-
search Company and is interested in
research work. The station at Med-
ford Hillside was designed by the
speaker and he explained the various
problems which the engineers and
himself had to confront. The tower
itself is two hundred and ninety-five
feet high and weighs seven tons. It
is set in sixteen tons of concrete and
is guyed by three sets of guy wires
which run from the tower to the
ground and are net in concrete. The
tower is set on a concrete slab which
in turn rests on four insulators which
are made to stand a breaking strain
of eighty-five thousand pounds.

A Christmas Suggestion

Present each of your friends with one of our beautiful Cravats, of which we carry an extensive assortment.
