JUNIOR CLASS DINNER

The Junior Class Dinner will be held in the Union dining room on Thursday, Jan. 8, 1916, at 6:30 o'clock. This dinner will be a departure from the old order of dinners in many respects. There will be a number of excellent speakers, each of whom will take his subject a different view of a topic of particular interest to all Juniors. The price per plate will be 75 cents and tickets may be obtained at the Cage and from the officers of the class.

JUNIOR PICTURE

Class Assembled On Rogers Steps Yesterday At One O'Clock.

The photograph of the Junior class, which had been postponed from Dec. 14th, was taken yesterday. The exposures were made, the grouping arrangement being the same in each case, much like that of last year. The picture will be printed in the Technical, and copies of it may be had after vacation.

CHEMISTRY DEPARTMENT

(Continued from Page 6.)

CHEMISTRY Laboratory will be equipped with a considerable amount of additional apparatus intended especially for instruction in Chemical Engineering, so that it really becomes a Laboratory of Chemical Engineering. This is intended to be the best anywhere. The Supply Rooms of the Department are to be found on each floor of Building 5, and special attention has been given to the problem of making them serve their purpose with the greatest efficiency. A notable feature of the Laboratories of Inorganic and Analytical Chemistry will be the provision for hands upon the working tables, which it is hoped will save considerable time to the students.

When the Walker Building was constructed in 1907 with a laboratory to accommodate 168 students, it was said that it was never likely to be filled. The new analytical laboratories will accommodate 356 students.

A New Model Typewriter!

The No. 9
OLIVER

BUY IT NOW!

Yes, the crowning typewriter triumph is here.

It is just out—and comes years before experts expected it.

For makers have striven a life-time to attain this ideal machine. And Oliver has won again, as we scored when we gave the world its first visible writing.

There is truly no other typewriter on earth like this new Oliver "9." Think of touch so light that the tread of a kitten will run the fingers of the typist. It puts the whole control of 84 letters and characters in the little fingers of the right and left hand.

And it lets you write them all by simplifying construction.

Thus writers of all other machines can immediately run the Oliver Number "9" with more speed and greater ease.

17 CENTS A DAY

Remember this brand-new Oliver comes at the old-time price. It costs no more than lesser makes—now out of date when compared with this discovery.

For while the Oliver's splendid new features are costly—we have equalized the added expense to us by simplifying construction.

Resolve right now to see this great achievement before you spend a dollar for any typewriter. If you are using some other make you will want to see how much more this one does.

If you are using an Oliver it naturally follows that you want the finest model.

CAUTION!

The new-day advances that come alone on this machine are all controlled by Oliver. Even our own previous models—famous in their day—never had the Optional Duplex Shift.

It puts the whole control of 84 letters and characters in the little fingers of the right and left hand.

And it lets you write them all by simplifying construction.

Thus writers of all other machines can immediately run the Oliver Number "9" with more speed and greater ease.

WARNING!

This brilliant new Oliver comes at the old-time price. It costs no more than lesser makes—now out of date when compared with this discovery.

For while the Oliver's splendid new features are costly—we have equalized the added expense to us by simplifying construction.

Resolve right now to see this great achievement before you spend a dollar for any typewriter. If you are using some other make you will want to see how much more this one does.

If you are using an Oliver it naturally follows that you want the finest model.
