BLANKET TAX ADMITS TO WRESTLING MEET

Wrestling Team vs. Springfield Y. M. C. A. College

Tomorrow

A Blanket Tax coupon will admit the owner to the wrestling meet tomorrow night, the first home meet of the season. The home team will be matched against the Springfield Y. M. C. A. College team. There will be seven bouts staged, in each of which the management hopes to be able to give a different body of men every term at 7.45 o'clock this evening in the Union. Professor Ralph A. Cram, the head of the Architectural Department, will explain to the society the architecture of the buildings which is now being carried on in Philadelphia. Prof. Cram is a member of the firm of Crann & Ferguson, of Boston, whose direction a large church is being built under the old English method of trade guilds. The organization of this system to modern building is the subject of the evening. The talk will be illustrated by stereopticon slides which Prof. Cram has collected. Refreshments will be served after the meeting.

WEDNESDAY NOON TALK
HELD IN THE UNION

Subject, "The Engineer In Society"—Meeting Jointly Of The C. E. A. and M. E. Society

Mr. Calvin N. Rice, secretary of the A. S. M. E., gave the first talk of the new term yesterday to the Union before a large number of students. His subject, "The Engineer in Society," was treated in an interesting manner. The speaker stated that the Mechanical Engineering profession was only about one hundred years old. Engineering as a profession begins when man manufactured power. Fortunately, there has been no way of getting power except by increasing the number of men or animals in the work. The "work being done by the T. C. A. is fitting men for greater responsibilities in life," so Mr. Rice said. The most important thing is to have it sound and the next a trained mind. The friendships made in college are the ones that are still the most helpful. To obtain friends, one must have wide sympathies. Until the engineering profession gives away service, it will not be on the same level with the other professions. Engineers in the engineering societies train a man to make a good appearance of himself before others. The speaker mentioned several companies which have in their firm a master of arts or master of science degree in social work. Everyone should serve his country in the best manner possible, and the engineer to do so is to render service. The engineering profession is steadily more important. Everyone can serve his profession best by becoming an active member of his society.

C HOICE a friend like you
would yo’ smokin’ tobacco. Don’t have one that ain’t worth keepin’ always an’ that you won’t grow to like better ev’ry day.

FRIDAY, FEBRUARY 11, 1916

The mid-year examinations all have surprises for everyone, but perhaps the biggest jar of all was reserved by the freshmen who substituted work on some of the athletic teams in the President’s office. It is to be hoped that the misunderstanding which now exists will be called up as soon as possible for the mutual benefit of everyone concerned.

President Fearing in the Institute Committee meeting yesterday sub- mitted the suggestion that the activities now maintained by the Committee select one man who shall always have the unwritten, but definitely understood in that activity, and, in case of his being unable to attend, that a note be sent to the secretary of the Institute Committee bearing the name of any temporary representative. Upon the degree of the support which the activities give this suggestion will depend largely the efficiency with which the Institute Committee meetings are conducted. At least there are about half a dozen men who can every now and then courage to get up and speak in the Committee meetings. It greatly inhibites the possibility of general discussion if the governing board is made up of a different body of men every time it convenes.

TWO HOCKEY GAMES
Team Leaves Today For Amherst And Williams

The Hockey Team will leave the North Station today at 9.07 o’clock for Amherst, where they will play this afternoon at 2.30 o’clock. Besides the game with Amherst, there is a game scheduled with Williams College tomorrow. The following men are going on the trip, their positions and years not yet been fully de- cided: Cart, Cochran, Swain, Tu- ttle, Toovey, Keeler, Watt, Thomas, and Lowengard. Prospects for victo- ries look bright to the management, although Wanamaker cannot go on the trip. Williams has a record of two wins and none lost for the season.

FACULTY NOTICE

Provisional schedule for French and Spanish electives is as follows: From Wednesday to Friday at 4.00—first class on Frisday; 1.30 on Wednesdays; 1.30 on Thursday and 4.00, in room 125 on Thursday, Feb- ruary 10.

1917 CLASS PICTURE

The Class Photograph of 1917, taken on Rogers steps, is on exhibition at the Central Offices. Orders for the picture may be left there or at the Tech- nique office. The price of the picture is $1.25.
