HISTORICAL EXHIBIT
AT NEW TECHNOLOGY
Summary Of Institute’s Advance
To Be Shown In Series
Of Pictures

"Fifty Years of Technology" is the
same given a spectacular histori-
cal exhibit, which will be held in
the new buildings during Dedica-
tion Week. This exhibit, arranged
under the direction of Mr. J. P. Munro,
will be a summation of Technology’s
achievement during the half century
of its service, showing advancements
in art and science and the connec-
tion of Technology men with this
progress. One room of the exhibi-
tion will show the advancement and de-
velopment of the Institute itself, giv-
ing evidence of the great changes
in the internal life and workings since
1864. This exhibit will not only deal
with the scholastic life of Technol-
gy, but with all the activities of
the student body.

Another room will show by pic-
ture details the connection of techno-
ology men with industrial de-
velopment. Early models of the
tabulator, telegraph, and other im-
portant inventions will be shown,
and with each will be given a
description of the part played by In-
stitute graduates in the achieve-
ment of their modern perfection.

The next exhibit will show the rel-
ation of Technology to the de-
velopment of the fine arts. This room
will contain examples of the work of
our artists, sculptors, and architects.
There will also be an accumu-
lation of the volumes published by
Technology men.

In the words of the Technology
Review, “The entire exhibition leads
up to a great architectural vision of the
things that will remain done as applied science. It is com-
pleted to have a painted frieze representing the Pilgrim’s Progress
of Technology, and these pictures
will be of such a nature that they
can be used for a permanent exhibit-
ion.”

DISCUSSION GROUPS
Professors Wickenden, Seaver
And Lewis Have Groups

During a period of about six weeks
discussion groups, led by professors,
will be held for the upper classes
for the purpose of discussion in
perfectly frank and informal way the
most vital moral and religious ques-
tions.
