ARCHITECTS ASSEMBLE

Professors Outline Work of the Past and Future.

Professor Cram spoke yesterday afternoon at 2.00 o'clock before the architectural students assembled in Huntington Hall, and touched upon many topics with words of inspiration: Beginning with an historic survey of the Department of Architecture at Technology, he turned next to a discussion of the greatness of the stimulus which architecture will inevitably receive as a result of the war—a stimulus that has not been equalled in the past five centuries, and which, Professor Cram stated, presents to architects an opportunity that is staggering in its breadth. Speaking again of Rogers, Professor Cram expressed the hope that a strong and worthy tradition may grow up around the new home of the department, which will make the school of architecture here distinctive in ways other than those in which it is already so celebrated.

Professor Cram presented Mr. Jenney, '83, instructor in the department and who was a student in the days when it occupied two dingy rooms on the top floor of Rogers, and when the library consisted, for part of the year at least, of a pile of books in a corner. With these and other anecdotes of the school in its infancy, Mr. Jenney gave an interesting account of his student days.

Professor Cram spoke again, concerning the departure of Professor Williams and greeting Professor Codden who comes to fill the vacancy.

Dividends are afforded to members, not only on textbooks and supplies, but on everything, such as clothing, furnishings, furniture, etc.

Complete details regarding membership and privileges of members may be obtained at the Technology Branch.

TECHNOLOGY BRANCH
HARVARD CO-OP.

\$1,000

Must be raised by Technology Undergraduates before the 15th of October. The success of athletics depends absolutely upon your contribution. In past years Technology has been represented in college athletics, meeting the strongest teams in track, hockey, wrestling and swimming. This representation was only made possible by the raising of finances through the efforts of undergraduates, and hearty cooperation of alumni.

THE ENTIRE BURDEN OF FINANCING TECHNOLOGY ATHLETICS NOW FALLS UPON THE STUDENTS

\$1,000

Is estimated as the smallest amount necessary by contribution. The failure of the Blanket Tax last year shows the seriousness of our problem. Are we to be represented on the track field, in the hockey rink, on the wrestling mat, or in the swimming tank?

EACH UNDERGRADUATE MUST DECIDE THAT QUESTION

Technology is one of the few colleges which has not self-supporting athletics, or a compulsory athletic tax. How can we finance our teams?

BY YOUR CONTRIBUTION

Secure an athletic button at once. It tells the story and you have done your part.
