Chemical Society visits drug plant

Process of manufacturing penicillin is explained to club members divided into small groups each conducted by a host member.

Second trip may be made

Fifty-five members yesterday visited the facilities of the well-known "Berkovitch Bros. Co." drug plant at 270 W. 13th St. and was divided into two groups, each under the direction of a host member. The first part of the visit was devoted to the production of penicillin, where the group was divided into two sections, one of which was to view the processes, including the operations of fermentation, extraction, and purification. The other section was to observe the equipment and machinery used in the production process. After the visit, the members were given a tour of the plant, where they were shown the various departments, including the research laboratory, the production area, and the packing house. The members were also given a chance to ask questions of the host member, who was able to provide detailed information about the processes involved in the production of penicillin.

Buccinctor returns to Boston

Technical Society members leave for a second trip in three days.

At noon yesterday the Technical Society of the university again assembled to leave for a second trip in three days. The trip, made from the bustling of the city to the quiet of the country, will be an opportunity for the members to experience the beauty of the countryside and to relax from their studies. The members will be leaving for the Deerfield Inn, where they will enjoy a comfortable stay and participate in various activities, such as hiking, kayaking, and picnicking.

Second meeting covering the Buettner side of the problem on the chemical club's meeting was held last evening. Professor E. M. Spafford, head of the chemistry department, was the speaker. He discussed the new developments in the field of chemistry, especially in the area of organic chemistry, and emphasized the importance of the role of the scientist in society.

Guests from the electrical engineering club were also present. They were interested in the new developments in the field of electrical engineering and discussed the various applications of this field in different areas, such as in medicine and transportation.

The meeting was well attended by students and faculty members, and the discussion was lively and informative. The club members look forward to future meetings and to continuing their efforts in promoting the scientific knowledge and its applications.
