E. E. SOCIETY EXCITING
The First Meeting of the Electricals
On Thursday, October 26, in Room 1-133, the Electrical Society will hold its first meeting. The program will consist of an opening speech and was briefly explained in a letter to students, which was circulated the day before.

COMBINED MUSICAL CLUBS
Annual Winter Concert and Dance at Sigma Chi
The combined Glee, Banjo and Mandolin Clubs will give their annual concert and dance in Sigma Chi today. The ticket price is $1.00 in advance and $1.50 at the door.

MECHANICAL ENGINEERING MEETING
INSTITUTE COMMITTEE MEETING
The last meeting of the Institute Committee was held this week to plan for the coming year. The committee plans to meet on a regular basis each week to discuss matters relating to the Institute's activities.

FRESHMAN FOOTBALL
Success in the freshmen class is the key to the success of the team. Without strong freshmen, the team will struggle to achieve victory. Therefore, it is crucial to focus on developing a strong foundation for the future.

RECEPTION TO GRADUATE STUDENTS
There will be a reception held in the Institute's library, which will serve as a great opportunity for students to network and socialize. This is an excellent chance for students to gain valuable connections within the industry.

CHANGES IN COURSE XIII
Summer Work for Annapolis

In 1918, the Naval Academy at Annapolis detailed a few men to this school to take an advanced course in Naval Architecture and Naval Construction. In 1919, the same number of men in groups from two to seven at the time have been sent here to complete their education as Naval construction engineers.

This year's men have come from Annapolis for a three-year course. Two large increases over the

MECHANICALS WILL VISIT WATCH FACTORY

This year's first Mechanical Engineering Society trip will be held on Thursday and Friday, and it has been arranged to visit the factory of the William Brown Company, manufacturers of watches and precision instruments. The tour will be given by the manager of the factory, who will explain the processes and machinery used in the manufacture of watches.
