M. E. SOCIETY MEETING

Captain E. S. Gorrell, U.S.A.

Captain Edgar S. Gorrell, U.S.A., a graduate of West Point, will speak on "Ambulance Service" at the Electrical Engineering Society meeting tonight at 7:45. The address will be on the subject of ambulance service at the front in the capacity of a driver of one of the important American ambulance units. While on the firing line he was able, with great difficulty, however, to obtain pictures which present vivid and unvarnished demonstrations of ambulance work which is constantly going on at the present time. Mileage will be given on the seven designs of ambulances, and photographs will be shown of some of the new casualties which those whose duties are in ambulance work are called upon to carry off. Address will be given at the Technical Library about 8:00 p. m.

PROFESSOR HARRY TYLER

Professor Harry Tyler, who is well known to the students of the university, will speak on "Experiences in the Aviation Corps" at the meeting of the American Institute of Electrical Engineers tonight at 8:00. Professor Tyler has just recently returned from France, where he was in active service at the front in the capacity of a driver of one of the important American ambulance units. While on the firing line he was able, with great difficulty, however, to obtain pictures which present vivid and unvarnished demonstrations of ambulance work which is constantly going on at the present time. Mileage will be given on the seven designs of ambulances, and photographs will be shown of some of the new casualties which those whose duties are in ambulance work are called upon to carry off. Address will be given at the Technical Library about 8:00 p. m.
