Suits pressed, $5

"THE "T" CONTROVERSY"

To the Editor of The Tech:

Dear Sir,—In my last communication addressed to the Editor of The Tech, I expressed the opinion that the "T" as now exists should be continued indefinitely. Athletics in general are going to receive considerable support as the establishment of the new conditions which will allow greater freedom to the athletic department, become more pronounced. The matter is one which will not be settled in one week or two weeks, but will take perhaps one year, or two years, to fix the relative importance of the different branches of sports at Technology. It is a good sign that suggestions have already begun to appear, but only after considerable thought the perfection of a suitable scheme will be a definite decision be reached.

THE "T" CONTROVERSY

The following extract from the annual report of President Roberts of Harvard is interesting to note, as it shows the standard of official Harvard in considering the Technology-Harvard agreement:

"The magnificient new laboratories of the Massachusetts Institute of Technology were completed at the close of the year, and it is my duty to express a decided opinion in favor of the immediate completion of the court in respect to our neighbors. It is an honor to make the agreement with the Institute. The buildings are a monument of the generosity of the donors and the wisdom of the trustees, and the result is a valuable addition to the educational equipment of the College which will be of benefit for untold years."

The "T" controversy will show interesting slides. As a result of a trip to the Canadian Province, "The Track Team was allowed sufficient time and funds to put the funds to good advantage against the third team in the conference that the "T" as now exists should be continued indefinitely. Athletics in general are going to receive considerable support as the establishment of the new conditions which will allow greater freedom to the athletic department, become more pronounced.
