NEW COURSE SUCCESSFUL
Head of Course **XA** Gives Promising Report

In his report last night to the Alumni Council concerning the new course in Chemical Engineering Practice, Dr. W. H. Walker, head of the course, gave extremely encouraging reports from Bangor and Stamford, which he has just visited. He will start soon on a tour of investigation of all the stations. Letters from the 30 students who began work at the five stations on the first Monday in February show great interest in the new venture. One man in charge of a section insisted on working with both shifts of his men and worked 21 hours out of a 24 day. Several manufacturers have invited the establishment of stations at their works which were not included in the original schedule. As a result the students at the Everett station will spend ten days at the local plant of the Merrimac Chemical Co. observing the production of various acids.

At Bangor the students are studying the losses of soda in the processes of the Penobscot Fibre Co., in order to obtain some data which the company much desires, but has been unable to secure before. The ability of the students to make minute researches will doubtless be of great value to such companies. An elaborate test has already been made of the electrolytic plant of the Easter Manufacturing Co., which produces chlorine and caustic soda.

1919 ELECTORAL MEETING

Nominations for Editor-in-Chief Are Reopened

At a meeting of the 1919 Electoral Committee held yesterday afternoon another ballot was taken on the election of Editor-in-Chief of next year's Technique.

The two remaining candidates are E. F. Deacon and G. R. French. Deacon received fourteen votes and French seven. After some discussion the committee voted to reopen nominations, and the following were nominated: D. D. Way, O. D. Mayer, G. R. French, and E. F. Deacon. Attendance at the meetings so far has been unusually small, while several times the whole board has been compelled to wait for almost half an hour before the necessary quorum could be obtained. The board therefore takes this opportunity to ask that all the members attend as regularly as possible, as much valuable time has been wasted so far. There will be a meeting today in Room 4-138.

E. H. S. BANQUET

The English High School Club will hold a dinner in the Caf this evening at 6.30 o'clock. The speakers of the occasion will be Mr. Stone and Prof. Hall, an English High School alumnus. There are now about sixty English High School men in the Institute and all are invited to be present at this affair. Tickets may be obtained from D. W. McArdle '18, R. L. Turner '20, or at the Caf, at fifty cents each.

PAN-AMERICAN UNION

Director-General to Address Latin-American Club

Mr. John Barrett, Director-General of the Pan-American Union of Washington, D. C., will address the Latin-American Club on March 9 at the Institute. Mr. Barrett, who is an authority on South American subjects, has as his topic "The Pan-American Union of the American Republics." The meeting will be open to all Institute men interested in South American affairs. The room and hour will be announced in a later issue of The Tech.

SPANISH-AMERICAN CLUB PROGRAM

President Lobos of the Spanish-American Club has laid out an attractive program for this term, designed to fulfill the purpose of the club, which is "to make the members more intimately acquainted with the United States and its institutions." As a prominent historian said: "The future of the Americans, North and South, depends on their mutual better knowledge of each other." On March 9 John Barrett, Director-General of the Pan-American Union, will address the club on Pan-American affairs. The club is inviting the whole student body of the Institute and all the Latin-American students of Harvard, Boston University, and Tufts to this address. Other meetings of the club will be addressed by Technology professors and other distinguished speakers. In April the club is to give a dance at the Hotel Somerset.

LOST ARTICLES

The following is a list of articles which have been found around the Institute and may be obtained at Room 3-005 upon proper identification: One small address book, one student's bag with name C. M. Osborne, one case of drawing tools, one black "Spear" pencil, one copy "New Complete Trigonometry," one copy "Essentials of Trigonometry," one pair of earlaps, one gray felt hat, and one umbrella.

INTERCOLLEGIATE MEET

Technology Meets New England Wrestlers Saturday

Entering the New England Intercollegiate Meet with the strongest team in years, the Institute wrestlers line up against Harvard, Tufts, Yale, Springfield and Bates Saturday at the Hemingway Gymnasium. The preliminary bouts will be run off in the afternoon and the finals in the evening. The annual meet between the M. I. T. Sophomores and the freshmen will be held at the Institute a week from Saturday.

VENUS 10¢ PENCIL

No matter what course you're taking you need this famous pencil!

BECAUSE of the superlative quality of material and workmanship, VENUS is the finest pencil it is possible to make. If you like a thick soft lead that marks so that you can read the writing half-way across the room, choose the soft degrees 6B—5B—4B.

For short-hand notes or easy writing 3B—2B—B (medium soft) are popular.

For sketching, general writing purposes, etc., HB—F—H—2H (medium) will prove desirable.

For drafting, a medium hard pencil gives the best results and you'll like 3H—4H—5H—6H.

For very thin, narrow lines for extremely accurate graphical charts, maps, details, etc., 7H—8H—9H are available.

Look for the distinctive water mark finish on each of the 17 black degrees and hard and medium copying.

Your professors will confirm these statements as to the merits of VENUS pencils.

For sale at the college book store.
