VENUS
10¢ PENCIL
 No matter what course
 you're taking you need
 this famous pencil!

BECAUSE of the superlative quality of material and workmanship, VENUS is the finest pencil it is possible to make.

If you like a thick soft lead that marks so that you can read the writing half-way across the room, choose the soft degrees 6B-5B-4B.

For short-hand notes or easy writing 3B-2B-B (medium soft) are popular.

For sketching, general writing purposes, etc., HB-F-H-2H (medium) will prove desirable.

For drafting, a medium hard pencil gives the best results and you'll like 3H-4H-5H-6H.

For very thin, narrow lines for extremely accurate graphical charts, maps, details, etc., 7H-8H-9H are available.

Look for the distinctive water mark finish on each of the 17 black degrees and hard and medium copying.

Your professors will confirm these statements as to the merits of VENUS pencils.

For sale at the college book store.

MR. C. HURREY TALKS

Yesterday afternoon Mr. C. D. Hurrey addressed the student body on the subject of the "Lure of the South," the South in question being South America. Mr. Hurrey, who is the secretary of the Y. M. C. A. of the entire Continent of South America, has made extensive investigations as regards the resources and conditions existing in the South American nations.

At present there is a great demand for sanitary engineers on the part of the governments. One of the requirements, he stated, is that the applicant must be a "flexible" man, that is, be able to adapt himself and his work to the needs of the people. By doing so, the man will have a much better opportunity for making a success.

AERO CLUB MEETING

The next meeting of the Aero Club will be on Friday, March 9, in Room 3-270 at 1.30 o'clock. The committee will read its report and present the Constitution for ratification, after which the election of officers will be held.

INTER-CLASS MEET

(Continued from page 1)

There were nearly thirty entrants in the mile run, crowding the track and causing considerable fighting for place. Zubiria '18 lead the field home in 4 min. 56 2-5 sec. He was followed by Dorr '20, Wells '18, and Bradley '20, respectively.

Rollins '18 heaved the shot 36 ft. 1 in., which distance is within two feet of the distance for the same event at the recent Harvard-Pennsylvania-Dartmouth meet. Jewett '19 was second with 34 ft. 7 in. Kellar '20 and Stevens '17 took third and fourth places with 33 ft. 6 in. and 32 ft. 8 in., respectively.

The score by classes was as follows:
 1st—1920—34 points.
 2nd—1918—21 points.
 3rd—1919—18½ points.
 4th—1917—14½ points.

During the afternoon, a telegram of encouragement was sent to the Varsity team at Philadelphia by the second string men gathered for the Interclass Meet.

TECHNOLOGY AERONAUTICS

(Continued from page 1)

Some of these articles are to be reprinted in collected form. In order to assure himself that the manner of the contribution of Technology men to the periodical should be agreeable to the Institute, Mr. Gardner has consulted the head of the Department of Naval Architecture, Professor C. H. Peabody, who is charged with the administration of the Graduate Course, and has placed his name on the complimentary list.

This has been spoken of by many of the Faculty as one more instance of the "advantageous co-operation of our Alumni with the work of the Institute." The wind tunnel has been very busy first with the instructional and thesis work of students in the Course, and also for private parties. The fees for private work are by special permission added to the appropriation for the Course and thus its earnings adds to its capacity for investigation.

Mr. Gardner was very active as an undergraduate, having founded the Walker Club, served on the Board of Technique, 1898, and The Tech, Volume XV. He is widely known as a publisher and supporter of the doctrine of preparedness, formerly acting as manager of the publications of the American Defense Society. He is a member of the Alumni Council, Secretary of the Technology Club of New York and was in charge of the "Cruise of the SS. Bunker Hill" last June during the Reunion.

FACULTY NOTICE

A lecture is to be given by Mr. William L. R. Emmet of the General Electric Company on March 12 in Room 3-270 at 4 P. M. on his invention of Electric Propulsion of Ships. This form of propulsion, which provides for good economy both at full speed and for cruising, is adopted for the United States battle cruisers of 180,000 H.P. There has been much discussion of this form of propulsion and Mr. Emmet can present the case authoritatively.

Professor Peabody, head of the Department of Naval Architecture, extends to all who are interested a cordial invitation to attend.

WALTER HUMPHREYS,
 Registrar.

FIRST YEAR PERSPECTIVE COURSE

The first exercise in first year Perspective, Course IV, will be held March 14 at 9 o'clock in Room 12, Rogers. Students should obtain "Principles of Architectural Perspective," by W. H. Lawrence, and should prepare the Introduction for the first exercise.

WALTER HUMPHREYS,
 Registrar.

LATIN AMERICAN CLUB

Mr. John Barret, director-general of the Pan American Union, will address the Latin American Club on "Pan Americanism" Friday at 5.15 P. M. in Room 2-190. The Latin American students of Harvard have been invited, and all Technology students and members of the Faculty will be welcome.

At the meeting of the club last Friday, the report of the dance committee was accepted and it was decided to give a dance at the Tuileries Friday, April 13. All Technology students are invited. Tickets may be obtained from the committee, comprising the following men: P. A. Piza '19, H. Beza-Montt '19, N. F. Alvarez '18 and A. de Zubiria '18.

WIRELESS MEETING

(Continued from page 1)

In the transmitting end the idea seemed to be to continually work for more power with no thought of efficiency. This was true until the law of 1912 came into effect, which required 200 meter waves for amateurs, and it became necessary to consider other factors besides power.

In the field of radio literature the Collins Wireless Bulletin was probably the pioneer, followed by the many publications on the market today. In one of the earlier numbers of this bulletin is shown a cartoon of the Czar talking war with the Kaiser by wireless, which was published over five years before the advent of the present war.
