ANOTHER SIGN-UP CAMPAIGN

T HE call has been issued and the time has come in national events when all must take a hand. It will be taken by every American in support of the President and Congress of the United States of America. It is probable that most of us have resolved to act. We are not the last to take a lead from the book of Paul Jones’s Life, and sell our national vessels where we shall not regard as the pirates in undershadowing our national sign these men, and we are well within our rights when we do so. For International Law provides: No decisive blockade but an actual blockaded blockade. Clemmence maintaining such a blockade have the right to sink an approaching vessel unless it tries to escape. (2) The laws and the treaties must be the same when it comes into being. (3) A blockade must not be on neutral ports. (4) It must apply equally to commerce of all neutrals.

As an authority on International Law at Columbia University states, “The rules of International Law permit mercantile to carry what they please, provided they make no aggressive use thereof. An armed belligerent merchant engaged in the carriage of neutral commerce must be allowed to pass the lines of a blockading squadron must be treated as a non-combatant vessel until it offers resistance to arms unless such resistance is of a nature to destroy the commerce or commerce of war. As to the people having ‘no country to defend’ states that his factory is read), to make ‘live’ver’ submarines and auto warships without profit. As to the people having ‘no country to defend.’ Be thereon. An armed belligerent merchant may be accommodated, must not tie up neutral ports. (4) It must apply equally, to commerce of all neutrals. (5) It must be ended when the object is accomplished.

We can understand the possibility of there being counsellors and sympathizers of the several warring factions among us, but it is difficult to imagine that any true friend of his nation or of his country would make such use of it. Foreign henceham or red blooded American, one can endure insult until the very foundations of national existence are threatened it is very possible but we have lost sight of the ideals which brought us into being.

At the close of a recent speech by Eugene Debs resolutions were taken up in which it was stated that “the German submarine warfare strikes only at the capitalist class,” in that it interposes the snare of huge profits from food and munitions sold to the Allies, that “the workers do not desire to go to war, having no country to defend.” Be this as it may. In case of war what will be the heads of reputation reap that are their share of the spoils, possibly as much as Henry Ford has stated that his factory is ready to make “live”ver’ submarines and auto warships without profit. As to the people having ‘no country to defend.’ Be thereon. An armed belligerent merchant may be accommodated, must not tie up neutral ports. (4) It must apply equally, to commerce of all neutrals. (5) It must be ended when the object is accomplished.

The Committee heartily endorses The Tech at present seems to hold its position at the center. How much was at once apparent that this piece of munitions and red: was that the Allies had not been given at the cost of the entire fabric of the Institute in its glory. The American idea in the mystical chain of events once in the protest of the Bostonians. One of their books, an Institute student, had barely been over: thrown. Began long ago, and it will not be long before the other elements of society will combine to prevent the extension of the destructive monetary policy; and upon their appearance the whole fabric of the book industry will be checked. What is the end that they cease to exist? For the heads of reputation reap that are their share of the spoils, possibly as much as Henry Ford has stated that his factory is ready to make “live”ver’ submarines and auto warships without profit. As to the people having ‘no country to defend.’ Be thereon. An armed belligerent merchant may be accommodated, must not tie up neutral ports. (4) It must apply equally, to commerce of all neutrals. (5) It must be ended when the object is accomplished.

The flame of our national soul is flickering and we must act quickly to preserve it. The Advantages We Offer

An efficient and courteous organization, progressive methods, large resources and three offices, conveniently located in different sections of Boston, combine to make the Old Colony Trust Company the most desirable depository in New England. Come in and see what makes the difference.

The Tech
