RUSSIAN MINISTER IN HUNTINGTON HALL

Recent Abdication of Romanoff's Elevates Milyukoff—Spoke in 1904 Before Lowell Institute

Paul Milyukoff, the new Russian Foreign Minister, visited Technology a little over ten years ago when in 1904 before the Lowell Institute he championed the cause of Constitutional Democracy for his native land. The lectures were largely attended and at the close of each many of his listeners made their way to the platform to shake him by the hand. Professor Leo Wiener, of the Department of Slavic Languages and Literature of Harvard University, spoke of M. Milyukoff at that time by promising that "the future may have great things in store for Milyukoff." In his first lecture in Huntington Hall the speaker described himself as "the last man to be consulted as to what would please the Czar of the Russias."

Both of these characterizations have been proven correct by the series of political changes which have occurred during the last ten years or so, culminating in the recent abdication of the Romanoff dynasty. Previous to his coming to the United States, as a Professor in a Russian University, he was arrested and spent four and a half months in prison for participating in student meetings which discussed matters distasteful to the autocratic government. He was liberated and gained permission to come to this country to lecture here at the Chicago University on the topic of "Russian Civilization." As an evidence of his mental capacity he mastered the English language during three weeks' sojourn in the British Isles.

On account of the aversion of the Russian ambassador to a meeting, President Roosevelt was unable to receive him at this time or on his second visit in 1905. Professor Milyukoff has long been considered an authority on Russian history and economics and at the time of his lectures in Huntington Hall had received a master's degree from the University of Moscow; he held a chair at the University of Bulgaria at Sofia and had done considerable research work of an archaeological nature in Macedonia. Professor Milyukoff is quoted by a London dispatch as saying: "We consider the abdication of the Emperor and the regency of the Grand Duke Michael (the former Czar's brother) as indispensable. He is also said to favor a limited monarchy based on a parliament as the best government for 'modern Russia.'"

COURSE XA MEN ON MOVE

(Continued from page 1)

Kodak Co. and the Taylor Instrument Co., at Rochester.

Those who have been at Niagara Falls go to Northampton, Pa., to the Atlas Portland Cement Co. They will visit the Buffalo Forge and Machine Co. and the Lackawana Steel Co., at Buffalo.

The men at Northampton will go to Stamford, Conn., at the factory of the American Synthetic Color Co. Among the factories they will visit will be the New Jersey Zinc Co., at Palmertown, N. J., the Murphy Varnish Co., at Newark, the Tide Water Oil Co., at Bayonne, the Corn Products Co., at Edgewater, the Babitt Soap Co., at Babbitt, and in Brooklyn the National Lead Co. The group in Stamford will go to Bangor, visiting on the road the Bristol Instrument Co., at Bristol, and the American Brass Co., at Waterbury.

Professor W. H. Walker, who is in charge of the course in Chemical Engineering Practise, has received reports from all the stations which are most encouraging. Professor Hugo Hanson writes that "the boys have been regular gluttons for work, and I found that they were staying up until one and two in the morning, till I put a stop to it." The students themselves have written very enthusiastic letters. The experiment which the Chemical Engineering Department made in establishing the school of Engineering Practise has been so successful that next year the invitations of several other large factories to have stations there may be accepted.

DR. TUPPER SPEAKS

State Secretary Shows Conditions Which Cause Immigration

Last Friday afternoon Dr. G. W. Tupper, immigration secretary of Massachusetts and Rhode Island, spoke on "The Background of the Immigrant." He began his lecture by asking the question, "What would you think of the man who had technique in materials but no idea of how to handle men?" In regard to man management he stated that twenty to fifty years ago most laborers were English-speaking; but the situation is changed now; the majority of them are non-English speaking people, who come from a country where human psychology differs from our own.

SEVENTY ATTEND CREW PRACTICE AT NEWELL BOAT HOUSE SATURDAY

Interest Among Upperclassmen Growing—On River in Two Weeks

Interest in crew seems to be growing, especially among the upperclassmen, over seventy men turning out for the practice at Newell Boat House Saturday. This is a material increase over the size of the squad that turned out a week ago and gives the coaches much more material to pick from. As the tank has been closed all of the work was done on the machines, every machine in the house being busy practically all the time from 2 to 4 o'clock.

There are some very good men out, some of them having had previous experience at other colleges. One man, H. A. Berliner, who is stroking the 1918 eight, has spent two years in Cornell and rowed on the varsity crew there.

There are also several football players out and some of the men who rowed in the freshman and Sophomore boats last fall. The interest that the upperclassmen are evincing is very encouraging and there is no doubt now that Technology will be able to put out a crew to represent the association against Exeter, Middlesex, Tufts and in the Harvard regatta in the spring.

The shells are now under repair and it is expected that practice on the Charles will be possible in about two weeks from now. The machines which are now in the basement of Building 1 will be moved back to the B. A. A. Boat House some time this week. The association has but four machines, but have sent out letters to the Alumni to get support from them in providing more machines and shells. There is no doubt that the various Alumni organizations will help in financing this new sport as soon as they become convinced that rowing has come to stay and that the men are really in earnest.

The order of the crews as they rowed Saturday is as follows: 1917—Stroke, McDonald; 7, Althouse; 6, Smith; 5, Lowengard; 4, Littlefield; 3, Perry; 2, Beaver; bow, Lane. 1918—Stroke, Berliner; 7, Sturtevant; 6, Goldsmith; 5, Wirt; 4, Allen; 3, Neuberger; 2, Blaisdell; bow, Fitch. Luykx, Merrill. 1919—Stroke, Deacon; 7, Quick; 6, Murdough; 5, J. J. Falkenberg; 4, Daube, Weiskittel; 3, R. L. Falkenberg; 2, Sherman; bow, Webster. 1920, first—Stroke, Burroughs; 7, Bigelow; 6, E. Wason; 5, Taylor; 4, Higgins; 3, Rowen; 2, Berg; bow, Cofren. 1920, second—Stroke, Schildbach; 7, A. Wason, Lockhart, 6, Mills; 5, Turner; 4, Zurlwelle; 3, Noelke; 2, Lovejoy; bow, Warriner.

Statistics show that from fifty to ninety per cent. of our railroads and similar projects are being built by non-English-speaking people. The fact was mentioned that there are two aspects of man-knowledge, that of the material side of a man, and that concerning his feelings and sympathies. Dr. Tupper then turned to Europe, bringing out the point that Europe is divided into two divisions, the upper left hand and the lower right hand section of the continent, each part having two different sorts of political and social ideas. The peasant, he stated, is quite unskilled and illiterate though not totally uneducated, and lives, even at the present time, according to medieval standards. In regard to our immigration the fact was mentioned that eighty per cent. of the immigrants come from the lower right hand section of Europe, and even after the war has stopped will continue to come from there. Italy furnishes the largest portion of this division. In this country there are two distinct races, those living in the northern portion and those in the southern.

Friday, March 23, at 1.30 P. M., in Room 10-250, Reverend Harry E. Fosdick is to address the student body. The subject of his lecture has not been announced as yet. Reverend Fosdick is also a Professor at the Union Theological Seminary, which is connected with Columbia University, and is pastor of a church in Montclair, N. J. He is one of the best-known authors and speakers before young men, having addressed many gatherings composed of college men. He already has spoken at Harvard three times this year and also has lectured before other Eastern colleges. Reverend Fosdick possesses much insight in modern problems, and also an ability to present his subject in a most interesting manner. He is the author of many extremely interesting books which have been read by thousands of students. His "Manhood of the Master" has been studied in discussion groups by many college men. "The Meaning of Prayer" is a book which Professor Wickenden of the M. I. T. Faculty calls "the best laboratory report" he has ever read.

RIFLE TEAM SHOOTS

OFF EIGHTH MATCH

The Rifle Team shot off the eighth of the indoor matches last week. The individual scores are as follows: G. R. Bond 178, J. C. Irwin 163, T. E. Stahl 163, H. M. Noelke 162, A. E. Tuttle 158, W. S. Burbank 148, H. J. McDonald 144, G. A. Irwin 141, K. S. M. Davidson 138, F. C. Howard (did not shoot). The team score is 824 (counting the five highest scores only); this is better than last week's score, but there is still room for improvement.

The schedule for Match 9 is as follows: Monday, J. C. Irwin and H. M. Noelke, 2.30-3.30; Tuesday, H. J. McDonald and K. S. M. Davidson, 4-5; Wednesday, G. R. Bond and W. S. Burbank, 3-4; Thursday, 1-2, G. A. Irwin; Friday, 2-3, W. Hadden and T. E. Stahl, 3-4, A. E. Tuttle. Captain Stahl earnestly requests that the men try to get to the range at the time scheduled for it not only keeps them from getting to shoot their targets on time, but also makes it very inconvenient for the man that they are to work with.

TRACK MEN MEET

(Continued from page 1)

team is stronger and Bowdoin's team is weaker this year than last, so this meet is classed as "easy." May 18 and 19 are the days of the N. E. I. C. A. A. Meet at Tech Field. Dartmouth has won this meet almost steadily for the past twelve years, but she will not compete this year, leaving Maine the favorite with M. I. T. a close second. As the meet is at home and there will be no traveling expenses, we can enter four men in each event.

Technology has once more climbed high enough in the track world to be invited to enter a team in the I. C. A. A. A. A. meet at Philadelphia on May 25 and 26. This is only the second time that such an offer has been made to Technology, and Coach Kanaly desires to have the team make such a showing as to put M. I. T. on the permanent list of those invited to the games.

Let the Beans Spill!

Such jars as those irk me not at all. I tie the can to care and bid misfortune go roll its hoop. You ask me whence the source of all this swank, swagger and supreme sassiness?—

Tuxedo

The Perfect Tobacco for Pipe and Cigarettes

Smoke "Tux" for serenity, comfort and content. No other tobacco will please your taste so thoroughly and so permanently—you'll never tire of "Tux".

That's because it's made of Burley leaf—full of sweet flavor and rich relish. And because it's had all the harshness and "bite" taken out of it by the original and exclusive "Tuxedo Process," so that you can smoke it all day long with increasing pleasure and no regret.
