tremely large. The Alumni are prepared to take up every conceivable branch of industry in connection with preparedness for war.

"But you undergraduates must consider yourselves an integral part of the Alumni Association except in such a crisis as would arise in case of civil rebellion or invasion. It is likewise your duty to prepare most fully in the lines of study which you have taken up. It should be your ambition to serve not merely on the field of battle for six months, but in the far wider, far higher field of industrial problems of the war for the rest of your natural life."

R. A. Wilkins, C. L. Kingsbury, O. D. Burton and G. Hutchings spoke upon the Technique Rush, plans for the Spring Concert, the Junior Prom and Tech Show, respectively.

BOSTON COLLEGE ADMITTED TO THE N. E. I. C. A. A.

It was announced that Boston College has been admitted to membership in the N. E. I. C. A. A. The Association now numbers seventeen members, the same number that it had before the resignation of Dartmouth last February.

Two Technology men, N. E. Tourtelotte '17, and F. W. White, Jr., '18, served on the committee that investigated the athletic situation at Boston College previous to admission to the Association. After years of comparative inactivity, the new member has once more taken an interest in athletics. Its football team last fall, coached by Brickley, the former Harvard star, attracted considerable attention in this vicinity. Its relay team for the past winter likewise caused favorable comment.

VENUS 10¢ PENCIL

No matter what course you're taking you need this famous pencil!

BECAUSE of the superlative quality of material and workmanship, VENUS is the finest pencil it is possible to make.

If you like a thick soft lead that marks so that you can read the writing half-way across the room, choose the soft degrees 6B—5B—4B.

For short-hand notes or easy writing 3B—2B—B (medium soft) are popular.

For sketching, general writing purposes, etc., HB—F—H—2H (medium) will prove desirable.

For drafting, a medium hard pencil gives the best results and you'll like 3H—4H—5H—6H.

For very thin, narrow lines for extremely accurate graphical charts, maps, details, etc. 7H—8H—9H are available.

Look for the distinctive water mark finish on each of the 17 black degrees and hard and medium copying.

Your professors will confirm these statements as to the merits of VENUS pencils.
