GROWING TOGETHER

VOLSTER XXXV has terminated the most adventurous and one of the most progressive years in the History of The Tech. A single year has seen the successful carrying out of a program of changes and sacrifices quite in keeping with the great Institute which, in its own way, it serves; and has likewise extended its field of usefulness and cooperation with other Institute activities in a manner which sets new standards and opens the way for new progress in the future.

Early in the Institute's history The Tech was organized as a socializing agent, to help overcome the obstacles in place and time which separate the student from the life of the Institute. After the years have passed, and its present length.

The story must be chosen: that discarded. To some extent, it serves; and has likewise extended its field of usefulness and cooperation with other Institute activities in a manner which sets new standards and opens the way for new progress in the future.
