FIFTY ACRES AROG TO
MAMSON BARRACKS CAMREN
New Land Will Make R. V. Training
Place Value Three Times Larger
SACRED HOMER, N. Y., June 30

It was announced today that
plans have been completed by the
department of the War of the United
States Army for doubling the capacity
of the reserve officers training camp
at Madison Barracks. According to state-
ments, arrangements have been made
for housing five thousand men in the
north and west of the present site, which with
the land already occupied, will make Madis-
on Barracks one of Uncle Sam's larg-
est training places for young officers.

Madison Barracks is where students
from the colleges in New York State
are being sent to train for service on
flexibilities. The men have been de-
certified suitable for the training of
the four student batteries of field artillery
by the battle of New York State.
Field Artillery already ordered there.
The reserve officers students are not
quartered in the old camp and will re-
main there for the present, making
daily trips to the new site for instruc-
tion.

Twenty-three of the students at Mad-
sion Barracks who have been here for
four weeks studying for commissions in
the infantry, cavalry, and field artillery
were notified today to report at Govern-
ment aviation camp at Elmhurst on 30th
day.

Plattsburg Men Scattered Now

At Lake Champlain, while the engineers
and many reserve officers having been
transferred to Fort Ethan Allen and
other training camps for the final spe-
cialized work before they receive their
commission as lieutenants.

PUT FINISHING TOUCHES ON INSTITUTE FLAGPOLES
Shields Stand for American Ideals
Says Professor Madison

The finishing touches are being put on
the two flagpoles in Dunlap and Lowell
Courts which were presented to the In-
situte by the classes of '32 and '33.

Formerly, the lower part of the flag
poles were designed to be0 employed
by President Madison during the
graduation exercises two weeks ago.

The top of the flagpoles are now
adapted for the two classes of '32 and
'33. May be used for drill purposes at
the YMCA towers training school at
the Institute.

Thursday and Friday of last week
work of painting the flagpoles was con-
cluded so that the colors might be flown
in a hoist to indicate the presence of
the Institute, I. O. E., in the town of
the University. Different grades
were represented by the colors of
the national flag, and the idea of
which they represented.

SOPH'S AT CAMPA IGNS

(Continued from page 1)
No student work was ordered
Tuesdays afternoon.

On account of the warm weather
which delayed the graduation of East Mar-}

ten, work on the barricades for the Techno-
logical campus was not completed. Some
students have not yet received their
assignments, but there is every indica-
tion that they will be assigned to work
for the remainder of the semester.

The weather is expected to be warm
and sunny, and the students will be ex-
pected to complete the necessary tasks.

SAYS PRESIDENT MADISON

At a Lake Champlain, while the engineers
and many reserve officers having been
transferred to Fort Ethan Allen and
other training camps for the final spe-
cialized work before they receive their
commission as lieutenants.

When Camp Cunningham is completed
for the training of the students of the
Institute, it will be faithfully, closer being held
in a service building, the
field, and the students will be
inspected. The site of the
station has been surveyed
and the nearly completed
completed. A narrow channel is being cut
through the field, and the
march will be held
in a service building, the
field, and the students will be
inspected. The site of the
station has been surveyed
and the nearly completed
completed.

A day or Camp Cunningham is to be
held at the Institute for
