THE INSTITUTE AND THE DRAFT

MONG the 687,000 who are to be drafted during the next few weeks, a significant number will be drawn from the ranks of Technology men. What will be the service they are called upon to do, rest with the Government working through the examination boards.

The Government would be far more interested in the future progress of America than in the service of an individual and will be more than willing to allow an individual to stay at the University if they elect to do so. It is the Government's policy to draft men who are essential to the military forces or the maintenance of national interest in order to assist in securing universal conscription of men for service after they graduate. If the Yale delay resulted in the failure to obtain a sufficient draft of men for the military service, it would result from the failure to obtain a sufficient draft of men for the military service.

It is to be hoped that the Government would be willing to allow a Technology man to stay at the University if they elect to do so. It is the Government's policy to draft men who are essential to the military forces or the maintenance of national interest in order to assist in securing universal conscription of men for service after they graduate. If the Yale delay resulted in the failure to obtain a sufficient draft of men for the military service, it would result from the failure to obtain a sufficient draft of men for the military service.

THE ADVENTAGES WE OFFER

BOSTON

INSURANCE OF ALL KINDS

HOMER F. LIVEMORE
INCORPORATED

To Technology men and women and all interested in the work of Technology in the war. The Friends of Technology has been organizing a semi-official team for service at Yale, and we hope that all Yale men and women will do their best to keep up the good work. All other men and women are urged to join the team. For further information, see the team office in the Administration building.

MAYBE the work of Technology in the war is not as yet as well known as it should be. We hope that these pages will help to make it better known.

TO THE ALUMNI

MORE than thirteen months ago, there was dedicated to the service of national education, the great gift of Technology's alumni.

This gift was not a single act, but a series of acts, each of which was made by a Technology undergraduate or Alumnus and each of which was made in response to a call from the University.

If you want to keep ahead of what is being done by Technology men and women, you will subscribe to The Tech now.

MUST READ GOOD GUIDE TO GET ON §°R EASY LIST

(Continued from page 9)

A newspaper is, of course, a living organism, and one which is in constant danger of extinction. It must be supported by the community in order to continue its existence.

The purpose of a newspaper is to inform the people of the world of what is going on. It must be supported by the community in order to continue its existence.

When the time comes, they will be found in the forefront of the ranks of infantry fighters in the trenches, where their knowledge of the Government's interests can be of the utmost importance, and where they can be of the utmost service after they graduate.

It is to be hoped that the Government would be willing to allow a Technology man to stay at the University if they elect to do so. It is the Government's policy to draft men who are essential to the military forces or the maintenance of national interest in order to assist in securing universal conscription of men for service after they graduate. If the Yale delay resulted in the failure to obtain a sufficient draft of men for the military service, it would result from the failure to obtain a sufficient draft of men for the military service.
