The War-Time Tech

**TECHNOLOGY itself is giving remarkably effective war service, to the Country.**

The **ALUMNII in large and rapidly increasing numbers are in the field, giving their work service to essential war success.**

The **UNDERGRADUATES are efficiently fitting themselves for similar patriotic duty.**

**TECHNOLOGY CLUBS ASSOCIATED**

**The WarmTime Tech**

**THE TASK AHEAD OF EVERY AMERICAN ENGINEER**

**THE TECH**

**A Focal Point of Activity**

The value of railroad materials and rolling stock alone, now being purchased, on account of the needs of the American Army is about 8 times that of all purchases made in the U.S. during the Civil War during the four years.

American engineers must undertake large operations in the construction and repair of railroads and highways over which our supplies will be shipped to the front. Five times that of all purchases made to be shipped to the front. They will be brought up to the battle line. The work of the aviator is vast, and engineers to carry out their task. The value of railroad materials and rolling stock alone, now being purchased, is about 8 times that of all purchases made in the U.S. during the Civil War during the four years.
