ALUMNI NOTES

WASHINGTON CORRESPONDENCE.

By Maurice R. Scharff

Executive Secretary, Technology Clubs Association

906 Tenth Street, N. W.

WASHINGTON, D. C.

PERSONALS

Charles Joseph Emerson, '04, who has been associated with the Army Aviation School at the Institute, has just started to make a trip of inspection of the other Aviation Schools located at several colleges throughout the country. He called at this office while he was on his way to Washington in interview Major Hornung, who is in charge of the organization.

Mr. M. F. Potter, '00, called, seeking information as to the present status of all the government businesses and connections. With him was Mr. J. W. P. Brown, a graduate of Stanford, who is also interested in this matter.

"Missouri" Jerry, who has been in the C. A. C. training camp at Port Moore, has been impressively demonstrated through a display of physical stamina. Among the graduates at the Washington college this week were F. M. Stimson, 50, and Lester Gumpsey, '96, graduates of Massachusetts Institute of Technology and including Frank C. Skinner, '86, the latter being the chairman of the committee. To this committee he is also one of the organizers of the National Capital Volunteer Guard, a company which is now in training at New York, and is intended to be developed into an anti-aircraft gun company for local service in the defense of the city of Washington.

A remarkable number of inventions has recently been applied for by inventors of the Massachusetts Institute of Technology. The latter being the chairman of the committee of the present body of the National Capitol Volunteer Guard, a company which is now in training at New York, is intended to be developed into an anti-aircraft gun company for local service in the defense of the city of Washington.

I must ask you to know this, especially at a time when our line of products is broadening and the price of everything is going up. This policy continues. It applies to every article we make for its purpose and at the price.

The DuPont Ocelot is Our Trade Mark

It is emblematic of an honest product, guaranteed by us as is represented—guaranteed—by the signature of our President and General Manager, Mr. F. W. Marquand, of the sales of our company. The DuPont Ocelot is the DuPont Ocelot, as you know it, and it is in charge of the aircraft engineering division of the General Electric Company, at the time of the manufacture of the DuPont Ocelot, of the aircraft division of the United States War Department, in the manufacture of the DuPont Ocelot, of the United States War Department, and in the manufacture of the United States War Department, it is emblematic of an honest product, guaranteed by us as is represented—guaranteed—by the signature of our President and General Manager, Mr. F. W. Marquand, of the sales of our company.
