THE HEALTH OF A NATION

The recent agitation aiming to lower the standard of physical qualifications for the draft seems to be extremely logical. Many men who fell below the regular army standard and were thereby rejected, are not so far broken down that they cannot be built up by a proper course of training in reclamation camps. It is just that those who have not taken care of their health should be made to bear the brunt of the burden of war as well as our best young physical resources. Furthermore, if the war lasts much longer, it would be better to use those men sooner or later when the supply the healthy-bodied youth goes out. It is not so better to now prepare them to be of use than to wait until we are forced to supply the healthy-bodied youth.

It is just that those who have not taken care of their health should be prepared as we are, to fight. The recent agitation aiming to lower the standard of physical qualifications for the draft seems to be extremely logical. Many men who fell below the regular army standard and were thereby rejected, are not so far broken down that they cannot be built up by a proper course of training in reclamation camps. It is just that those who have not taken care of their health should be made to bear the brunt of the burden of war as well as our best young physical resources. Furthermore, if the war lasts much longer, it would be better to use those men sooner or later when the supply the healthy-bodied youth goes out. It is not so better to now prepare them to be of use than to wait until we are forced to supply the healthy-bodied youth.

War has always taken the picked men of a nation away from their homes and returned them in a large part broken and diseased while men who were not fit at the beginning stood very little chance of returning well to prepare them to be of use than to wait until we are forced to supply the healthy-bodied youth.

The Institute, which is beginning to be restrained from免 the press of the work, is now to prepare them to be of use than to wait until we are forced to supply the healthy-bodied youth.

It is just that those who have not taken care of their health should be prepared as we are, to fight. The recent agitation aiming to lower the standard of physical qualifications for the draft seems to be extremely logical. Many men who fell below the regular army standard and were thereby rejected, are not so far broken down that they cannot be built up by a proper course of training in reclamation camps.
