Large Numbers of Reservations

DANT WILL RETURN INSTRUCTORS
WASHINGTON, Aug. 16.—From the training camps just opened, a considerable number of the instructors have already returned to Washington, and these will be immediately dispatched to France under special orders. The plan provides for establishing as many schools as may be necessary in France to render the service available to men who have had limited training or have never had any training whatever. The men will be sent to the regular army contingent already on the active service.

Some to Join Regiments
It is now possible to say that the men will be joined to regiments as soon as they arrive in France. Once there, they will be given a thorough medical examination, and the more intelligent and energetic will be assigned to the various branches of the service. The plan is to train the men in the regular service and to send them out to the front as soon as possible. The men will be given a thorough medical examination, and the more intelligent and energetic will be assigned to the various branches of the service.

TECHNOLOGY OPEN UP WITH COLLEGE CENTER IN PARIS
Lansing '98 Has Already Started Club For Institute Men in Service Abroad—Fitted With All Comforts of Home

STENOGRAPHERS GET $70 A MONTH

THE Technology Club of Paris is now a reality. A letter has just been received from Van Rensselaer Lansing '98, telling of his efforts to secure the horse started for Technology men in France. Mrs. Cunningham has turned the letter with a few omissions to the public press.

Lansing sailed on the Chonoscheaux recently to represent the Technology Center in France, a bureau to look after the interests of Technology men in France and to get all possible information for those men and their families at home. For similar purposes other colleges and universities are sending representatives abroad whose work will eventually be united under the American University Union in France. The Technology Center will be amalgamated with this organization.

Men Have Had No Chance to Form a Local Technology Club
FORT LEAVENWORTH, Kansas, Aug. 16—There are twenty-three Technology centers among the regiments of army officers who are serving in France from neighboring forts on June 15 to prepare for battle. It is hoped that all the insti-

The letter was received from Mr. E. C. H. S. E. and was turned over to the public press. The letter was written by Mr. Lansing '98, who was once a student at the University of Technology in France.

The hotel was held by the American Legion, and was fitted with all the comforts of home.

TECHNOLOGY CLUB CALLS ON TO JOIN

The first official news was sent to the Technology Club of Paris, France, Thursday, August 16.

The letter was addressed to Mr. Lansing '98, who was once a student at the University of Technology in France.
