Reinforced Concrete

Twenty-five years' experience, an
accumulation of engineers, superin-
tendents and foremen, each one
as expert in his particular field, the
most progressive methods, and no
equivalent equipment enables us to
come out and concrete the biggest and
most important reinforced concrete
structures. It is the highest standard,
speed, and economy.

THE COMBATANTS AT YPERSE

The above map shows the field of British operations at Messina. The broken line of circles is approximately the old
positions of the British lines. The dots of circles is the present position,
the British after the exploded mines under the works on
Western Front.

"tional Inventors' Society.

The THERMOMETERS

(Tieton, 2500,000, and very likely is less
in spite of losses, Germany's arms
are still a fact, the present disposition of Ger-
mana's will determine the next move, a fact
which is not in the least surprising. Watt.

In any event, the impending collapse
of the Russian offensive is a fact, and the
attenuated Teutonic line is a fact, in spite of
which the German Staff has no intention of
dictating the next move, a fact which is
not in the least surprising. Watt.
