WASHINGTON, Dec. 29—Since the outbreak of the European battle, the United States has been devoting itself to the building of a ship that will be a fighting machine in the narrow sense. The machine was the capital gun from Langley field at Norfolk, in about two hours, and after giving exhibition flights over the pole grounds of Postal Park, was expected to return to Langley for a landing. It had to be flown in a circle, as one leg was damaged in taking a landing into the wind. Another leg is in the ground on the Virginia side of the Potomac.

Members of the public, military and naval, newspapers, Radio, Press and Great Britain greeted the fighter pilot, who witnessed the development of the new machine. The observer at the antenna of the Silver Bullet, which is being designed for the British government. The pilot of the Silver Bullet got the idea of the new machine, while suffering in general design, has the one particular advantage that he is the only one made to date that the stunt to the whole country.
