CAME OUT FOR COURTESY.

TOMORROW night will be a momentous one in the student life of Technology for the coming year. The occasion will be the second annual "Courtey," the ceremony which welcomes the year and plans the work for the term, and makes them acquainted with the various phases of undergraduate affairs. Every true Technology man, therefore, should be there to participate in the celebration, and the freshmen are expected to show the stuff of which the infant class of 1918 is made by being present with all the enthusiasm of which they are capable.

It will be their first opportunity to begin the cultivation of that "class spirit" which is to carry them through Field Day and have through the Institute. Let them make the most of this opportunity, for their rivals the Sophomores have already done it and are looking forward to seeing how they measure up.

For this occasion, however, a truce will be declared and the entire house will join in giving the newcomers a rousing welcome to begin one of the most notable years in Technology's history.

GRASP YOUR OPPORTUNITY.

NEW men at the Institute have, by this time undoubtedly become aware of the existence of the Tech either by having been solicited for a subscription or by having purchased one of the first issues of the school year. They are perhaps acquainted with the various phases of undergraduate affairs. Every true Technology man, therefore, should be there to participate in the celebration, and the freshmen are expected to show the stuff of which the infant class of 1918 is made by being present with all the enthusiasm of which they are capable.

Let them make the most of this opportunity, for their rivals the Sophomores have already done it and are looking forward to seeing how they measure up.

For this occasion, however, a truce will be declared and the entire house will join in giving the newcomers a rousing welcome to begin one of the most notable years in Technology's history.

GOVERNMENT ADOPTS NEW "100 MILE" LAW.

The Secretary of War today made known to the press that the Department of War will adopt the so-called "100 Mile" law. The Secretary has been working on the law for several months, and it is believed that the new statute will be ready by the middle of October.

According to reports, the law will become effective on the first of the year. It is said that a large number of people will be affected by the new law, but that it is not expected to cause any serious hardship.

The law provides that all persons desiring to obtain a license to engage in the manufacture of arms or ammunition must first obtain a license from the Secretary of War. The license will be valid for a period of one year and must be renewed annually.

After a series of revolts between military and civilian engineers the design of the standard truck was completed in 1910. The original truck was completed in 1911.
