MILITARY WORK WELL Under Way at Bilkith

Freeman Course is Compulsory and 400 Men Have Reported

HANOVER, N. H., Sept. 29—Military work at Bilkith is well under way, with Capt. Kester of the Canadian forces and Capt. Pribble directing the training.

The freshmen are instructed in the care of individual equipment and are divided into two battalions of three companies each. Instruction is given twice a week, and the barracks are used for the training.

Lectures will be given by different officers, and the instruction will be given in both uniform and casual dress. The course is designed to prepare the students for the regular classes and to give them an opportunity to observe the work of the regular men in the field.

A disciplinary uniform for the Bilkith men is being designed, with khaki for the hat and collar. An effort will be made to get every man to do his part, and he will be given an opportunity to go to work in the best way.

CHRISTMAS VACATION FROM DEC 24 TO JAN 1, FACULTY RULES

The Christmas vacation from December 24 to January 1, 1917, includes all classes in the Faculty Rules. This is contrary to the statement made by a number of the faculty rules of "dual" which were given from December 25 to January 1, 1917. Therefore, on Monday, we will enable students to take leave for the last half class on Tuesday, December 25.

PRECAUTION OF MEASUREMENTS

A special course of lectures for college students will be given from December 18th to 8th, inclusive, from 4:00 to 6:00, inclusive.

HARRISONS
RUST-PREVENTING
ANTOXIDE

Gives maximum protection on all exposed metal surfaces

It will lengthen the life of all metal which is exposed to rust. Can be used on galvanized iron over a first coat of Harrisons Galvanised Iron Primer.

The increasing use of sheet metal roof-buildings has created an enormous demand for a good rust-preventing paint.

We have used this paint on exposed metal buildings, fire-escapes, pipelines, etc., around our own plant, under the trying conditions which prevail around any acid- and paint-manufacturing plant and have been unable to find anything better for our own use.

To property owners who are really interested in the problems created by rising costs of upkeep, we will gladly send a beautifully-printed brochure, which gives the practical experience of property owners, municipalities, etc., with—
