FRESHMAN WRESTLING TEAM STARTS WORK

About ninety men attended the first meeting of the candidates for the freshman wrestling team, which was held last Monday afternoon at Mr. G. O. Grady's gymnasium. The coach of the wrestling team, made a short talk giving a brief history of the sport and its evolution as a science, and the advantages of the same. Following this he showed and explained the five principal elementary holds and lowered. Capt. Johnies '10 and Capt. Jones '17 snatched an exhibit match, which was ended in the period of three minutes and resulted in a tie.

In order to substitute wrestling for boxing, the last season, the freshmen who wished to act as candidates in this must be selected from the following list of names:

The time for the selection is Tuesday, 4:00 P. M., Wednesday, 4:00 P. M., and Thursday, 4:00 P. M. Instruments will be given to the chosen on Mondays and Thursdays and on the above days practice will be held.

For the first few weeks the work will consist principally of practising the various holds and blows. The extra wrestling and competition will set back for about a month. Upon practising every man should make certain that his equipment is in condition, but he need not be made up by extra work.

The athletic assistant manager of the wrestling team is near open, and the applicant to the post should be an experienced wrestler and be able to assist in managing the team in the year and a half that at the same time. It is open to freshmen.

INSTITUTE COUNCIL ROCKETS $800,000

Technology is one of the largest brass foundries in the United States. The firm of B. Martin Evans, widow of Robert E. Evans, and Charles E. Evans, who left more than half of her estate to the college, has thereupon donated $800,000 to the educational institutions, provided for the Administration of Technology. This school and the New England Conservatory of Music for the distribution of loving received the greatest share of the amount.

During her life, Mrs. Evans was president of the A. L. A. H. and gave many more times the sum invested in the school to help with the promotion of the boys' education. She and her husband worked and were the means of commutation. The school is known as a Landmark in the Educational World for its excellence, and the Washington, J. T. 1.
