Second Pow-Wow to Be Held Sunday

Professor Carm, of Architectural Department, spoke up on "Venice and Its Importance in the War." The opportunity of such an event to devote itself to the cause of the United States, and Professor Carm is exceptionally well qualified to present this topic.

"The city of Venice," he continued, "has been a constant source of inspiration to us, not only for its beautiful architecture, but also for its rich history. It is a place where we can learn about the evolution of human civilization and its impact on the world.

The reader will notice that we have made an effort to avoid repetition in this report, and we trust that you will find this omission to be a distinct advantage.

In view of the uncertainty as to the exact date, no tickets are being sold with respect to enrollment. President Macaulay and Mr. Burrell will act as registrar for any interpretation and admission to the place. The call will probably be on short notice before the next meeting is held.

Walker Club to Hold Annual Reception in Memorial Hall.

The annual reception for all students, alumni and friends of the Society will be given this evening by the Walker Club at the Residence of the Walker Memorial. The reception will include the President, the President-elect and the faculty. We shall be delighted to have you join us in this event.

At a recent meeting of the Club, C. A. Shaw, late student of the class of 1916, was elected president, and assistant leader of the Banjo Club, and last fall took one of the places in the class in the student's orchestra.

The reception will be held on Thursday evening, December 12, from 5.00 to 8.00 o'clock. The door will remain open from 5.00 to 6.00 o'clock.

Mr. T. A. Adams Cram, head of the Department to Speak Upon "Electricals to Visit Pumping Station Today."

The Student Branch of the American Institute of Electrical Engineers will take the first trip to the Central Hill Pumping Station this afternoon. This station is the largest and used complete equipment of any pumping plant in New York City. It utilizes the energy of fresh water supplied to Belgium via the Mohawk Valley and has a capacity of 30,000,000 gallons per hour. This special interest on account of the varying conditions of the environment will be presented at the meeting, and the student body is expected to be interested.

The student body has obtained a special permit to visit this station and those who wish to go should have a ticket from the Tech Show office. The annual reception for all students, alumni and friends of the Walker Memorial.
