TWO BRANCHES OF R. O. T. C. RECEIVE
RECOGNITION FROM WAR DEPARTMENT
Signal Corps and Coast Artillery Divisions of
Military Science Begin Work Under
Governmental Sanction

A communication just received by
President Marksfield of Technology from
the Chemical, Mechanical, and Electrical
Departments of the War Department has
finally dispelled the rumor that the
University has not been recognized as
branch of the Signal Corps. Official
information has been furnished by the
other Signal Corps units composed of
Technology engineering students. A new
branch of the Signal Corps was
recently organized by the War Depart-
ment, and the University has been
recognized as a branch of that
organization. The branch will consist
of two companies, one from the
Chemical and one from the Mechanical
Department. The companies will be
organized at once, and the first
squadron will be at work as soon as
possible.

The New Branches of the Signal Corps
are to be composed of four officers and
twenty-five men. The officers will be
appointed by the War Department, and
the men will be selected from among the
students of the University. The
companies will be under the command
of Capt. A. Waller, Jr., and Maj. R. C. Black,
respectively. The officers will be
appointed by the War Department, and
the men will be selected from among the
students of the University. The
companies will be under the command
of Capt. A. Waller, Jr., and Maj. R. C. Black,
respectively. The officers will be
