CONCRETE SHIPS AS POSSIBLE SOLUTION OF THE SHIPPING PROBLEM

The United States is at present facing the problem of a large naval program to be carried out in the building of seagoing ships. The Navy Department makes the world's largest order of shipbuilding for the United States since the War of 1812, and the first line of ships are to be the new 12,500-ton cruisers which have been ordered for the fleet. These ships are to be built by the American shipyards and will be powered by the latest available engines. The American shipyards have been working on this problem for some time and have made great progress in the design of these ships. The United States has been working closely with the American shipyards to ensure that they have the necessary resources to carry out this program successfully.

The American shipyards have been building ships for many years and have a wealth of experience in this area. They have built ships for the military and for commercial use, and have a great deal of knowledge about the design and construction of these vessels. The American shipyards have been working closely with the Navy Department to ensure that the ships they build are of the highest quality and that they meet the requirements of the military.

The American shipyards have a great deal of experience in this area and have been building ships for many years. They have the necessary resources and expertise to carry out this program successfully. The United States has been working closely with the American shipyards to ensure that they have the necessary resources to carry out this program successfully. The American shipyards have been working closely with the Navy Department to ensure that the ships they build are of the highest quality and that they meet the requirements of the military.

In addition to the opportunities afforded in the design of new ships, there are other opportunities available in the area of the design and construction of existing ships. The American shipyards have been working on this problem for some time and have made great progress in the design of these ships. The American shipyards have been working closely with the Navy Department to ensure that they have the necessary resources to carry out this program successfully.
