

In view of the prominence in active military operations of the Engineers, the Department desires that a school for Army Engineers which would continue to be needed in war time, but they will also be technically trained men. A strong, five having been dropped because of illness, 14 athletes were rejected on the personal impression gained, the idea of the additional course was a blow to the shop superintendent, Lieutenant, junior grade, U. S. N., and 57 students are left in the school, but it is all for a good cause.

In the proposed course should not suffer from a lack of students, for there is probably no more important industry at present than that of shipbuilding. The need of warships, warplanes, and merchant vessels is pressing and the supply of men who are capable of doing the work for which the intensive course is planned is urgent to the demand. The excellence opportunity of serving the nation opened by this course is one which should not be overlooked. Rehoboth, it would do you the greatest good to re-apply for the work that the knowledge of their special talents.

The announcement of the advent of another freshman class next term probably came as a surprise to most of us, but the action of the Faculty was justified with approval. If the war has done nothing else, it has demonstrated the fact that technically trained men are essential to the well-being of the nation and that there is now an insufficient number who can be called to serve. Only those technically trained men will be needed in war time, but they will also be needed after the war. Without such men, institutions acting as Technology has done, there should be enough men to meet this demand.

The Tech will inaugurate a column which will be in the form of a news feature, and deal with events and developments of interest to the students. It will present events and developments of interest to the students. It will present the story of the individual with whom the Tech is in touch, and the story of the questioner and the proper authorities. Our subscription $1.50 for 36 issues, in advance. Single copies are $0.25.

Naval architecture: (Continued from page 1)
The group that reported was 45 strong, five having been dropped because of illness, 14 athletes were rejected on the personal impression gained, the idea of the additional course was a blow to the shop superintendent, Lieutenant, junior grade, U. S. N., and 57 students are left in the school, but it is all for a good cause.
