New Course to be Offered to Senior Students: This Fall Semester

The Alumni Advisory Council at MIT has announced that a new course, titled "Effects of War Conditions on the Student," will be offered to senior students this fall semester. The course will focus on the impact of the war on student life and the solutions that were adopted to ensure continued education. Students interested in the subject are requested to contact the council for more information.

Power Plant Tested at Laboratory

A power plant tested recently at the Laboratory for the School of Industrial Engineering is expected to be ready for service in the near future. The plant, which is being used to supply electricity to the institute, is of the latest design and is expected to meet the demands of the campus.

Chemical Society to Hold Meeting on Industrial Research

The next meeting of the Chemical Society will be held Friday evening at 8 o'clock in the Auditorium. The meeting will include a discussion of the work of the Meisenheimer Institute, which is engaged in industrial research.

Five Hundred Graduates of Institute Will Attend Annual Banquet

The annual banquet of the Institute for the graduating class of 1918 will be held Saturday evening at 7 o'clock in the Memorial Hall. It is expected that a large number of the graduates will attend the banquet, which is an opportunity to celebrate the end of their academic journey.

There will be an important meeting of all members of the Institute for tomorrow in the technical office.
