THE PASSING OF THE ARMY AViators.

It is with regret that we learn of the departure of the Military School of Aeronautics. The presence of the aviation department has lent a martial air to our buildings and we have felt a pride in the honor which the Government has been showing us by housing them at the Institute. At present we do not know where they are going, but we may be certain that we shall soon hear of them dropping bombs on Kaiserdom and ferreting out the work of the "Kaiser's Scarecrow." Theloss will be felt, but we have confidence in the ability of the senior classes to complete the work which has been left with them.

THANKS.

We thank the Tech Review most heartily for the splendid commendation which it gave in its July and November issues to the War-time Tech. The "boost" is sincerely appreciated and we hope that we will continue to meet with the approval of the Review. We will endeavor to maintain the high standard of neatness which was set for us by the monthly issues of the Review. The job is a man-sized one, but we have undertaken it with confidence that we shall be able to do the shoes left behind by the discomfiture of these monthly issues.

One thing, however, will not be lost sight of. The undergraduate department must be as carefully covered as heretofore and we hope that the student body will appreciate that we are trying to serve as the official organ of literary activities, both Alumni and undergraduate.

You may now get your certificate of approval from the Faculty for enlistment in the Engineer Reserve Corps. The applications must be accompanied by postage at the rate of one cent a copy. Issues mailed to subscribers within the Boston Postal District or outside the United States must be accompanied by postages at the rate of one cent a copy. Issues mailed to all other points without extra charge.

THE TECH
Established 1888

Tuesday, January 8, 1918

The Question Box has been inaugurated for service. So many questions have been addressed to it, that it is probable that all doubts have been expressed among both the students and the Alumni about the relations of Technology and co-operation. To this end, the War-time Tech has decided to establish a question box for clearing up points of interest to any student. The Editor-in-Chief is always responsible for the opinions expressed in the editorial columns, and the Managing Editor for the matter which appears in the news columns.
