### Class of 1915
- W. B. Soper, 2nd Lieut., Marine Corps.

### Class of 1916
- W. B. Soper, 2nd Lieut., Marine Corps.

## The Sacrifice to War

There is a widespread feeling that American education is set as an engine of success for the United States as a great contributor to the war. The spirit of the last year has shown that the need is two-fold, first, the need of the Government for a large number of teachers to serve in the military, second, the need of the public school system for a large number of teachers to serve in the military. The Government, working in cooperation with the public school system, is now making an effort to train drafted teachers as quickly as possible. The schools are needed for instruction work. A month from now the last of the men will be sent to the military. The schools require a large number of teachers to be trained, and the military service requires a large number of teachers to be trained. The government is not so well off for unity of spirit and purpose as it is in the case of the public school system. The government is not so well off for unity of spirit and purpose as it is in the case of the public school system. The government is not so well off for unity of spirit and purpose as it is in the case of the public school system.
