4. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

5. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

6. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

7. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

8. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

9. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

10. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

11. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

12. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

13. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

14. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

15. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

16. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

17. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

18. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

19. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

20. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

21. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

22. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

23. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

24. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

25. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

26. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

27. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

28. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

29. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

30. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

31. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

32. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

33. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

34. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

35. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

36. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

37. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

38. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

39. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

40. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

41. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

42. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

43. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

44. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

45. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

46. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

47. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

48. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

49. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

50. The Institute has been made the temporary home of the United States Naval School of Engineering, which has been transferred from Annapolis to the Institute. The students of the School are now working in the laboratory and in the workshops of the Institute.

The above list is not exhaustive, and many other activities in which the Institute is engaged are not included. The Institute is doing its utmost to help the Government in every possible way.
