NEARLY FOUR THOUSAND ON M.I.T.'S T.H. ROLL

The War Service Auxiliary Organized for in Touch With Every Young Man Who Enters the Service

AFFILIATED WITH RED CROSS

The War Service Auxiliary of Tech has thus sent out 1,200 books, 600 service boxes, and more. It is true that there has been some difficulty in getting a sufficient supply of books. The military authorities are trying to speed the distribution of books, and the Red Cross is mobilizing all the forces at its disposal. It is hoped that the number of books sent out will increase in the near future.

It has been reported that the men of the United States Signal Corps are being taught the principles of radio and wireless methods, and that they are being prepared for service with the United States Army. It is also reported that the men of the United States Signal Corps are being trained in the use of the telephone and telegraph, and that they are being prepared for service with the United States Navy.

The United States Signal Corps is a corps of the United States Army, and is responsible for the maintenance of the United States Army's communication system. It is the responsibility of the United States Signal Corps to ensure that the United States Army is able to communicate with itself, and with other nations, in times of peace and war.
