REGISTRATION SHOWS A SLIGHT DECREASE

Registration for the second term at the Institute stands at 324, a remarkable decrease from 324 the first term. The steady increase of the last two years, which is due in no small part to the continued growth of the faculty, has been offset by the unusually large number of students who have registered for the second term. The latter group includes a number of students who have transferred from other institutions and who have been unable to complete their work in the first term.
