Mr. Young Speaks on "Safety First"

Two Thousand Men to be Trained in Boston by October

Mr. James P. Monroe '82 is Now in Boston Investigating the Possibilities of Industrial Education Here.

Technology May Not Be Effected

Mr. James F. Monroe, vice-chairman of the Federal Board of Vocational Education, is present in Boston with Army officials for the purpose of studying the best methods of training men for manufacturing industries. The men are to be trained in various technical institutions of the country, and it is expected that they will be put into operation by November or December. Arriving under authority of the War Department, the Board's mission is to investigate the maximum possibilities of vocational education for the army. The Board is empowered to aid in the establishment of various types of schools for the training of vocational experts, and it is expected that the students, through the medium of the vocational education program, will be enabled to bring their technical ability to bear on the problems of efficiency in training men for the armed forces.

During the present campaign for the preparation of the vocational training program, the Board has been able to determine many of the technical problems involved in the technical education of the army. It has already been determined that the training of technical students must be based on a careful study of the requirements of the various branches of the army, and it is expected that the Board will be able to determine the requirements of the various branches of the army in the near future. The Board has also been able to determine that the training of technical students must be based on a careful study of the requirements of the various branches of the army, and it is expected that the Board will be able to determine the requirements of the various branches of the army in the near future. The Board has also been able to determine that the training of technical students must be based on a careful study of the requirements of the various branches of the army, and it is expected that the Board will be able to determine the requirements of the various branches of the army in the near future.
