**LETTER RECEIVED FROM AMERICAN UNION - TELLING OF WORK DONE FOR SOLDIERS**

A letter has been received from Mr. James Phelps Bevan, chairman of the Student League of the University of Wisconsin in Europe, who is at present a member of the American Legion and serving as the Scientific Peace Commission in Europe. He writes:

"I am delighted to know that in your last report you mentioned the work of the American Union and the success of its efforts. We have been working hard at the University of Wisconsin and have been sending out letters to all the universities in the United States asking for help. We have been successful in recruiting many new members and increasing our influence. We have also been conducting a number of meetings and lectures to spread our message."

**STUDY IN WAR TIME**

(From the Boston Transcript)

Students at Cornell lately had the opportunity to study the principles of the lawd and to give the student such training as would enable him to become a lawyer. The course was given in the afternoon and was attended by a number of students.

"The study in war time is the duty of each and every individual, and the problems of the day are more important than those of the past. The student must learn to think and act for himself, and not to follow the dictates of others."

**AIMS OF THE GERMANS IN THEIR OWN WARS**

(Daytrip from a pamphlet issued by the American public information association.)

The aim which appears so important in the present war is the establishment of a German empire. For we are not satisfied with the present boundaries of our empire, and feel the necessity for expanding it. Our aim is to conquer the world and to bring all nations under our rule. The aim of our war is to conquer the world and to bring all nations under our rule.
