I. The Question Board has been in existence for 30 years. So many questions have arisen, and so many doubts have been dispelled among both the student body and the Alumni about the solutions of the problems and difficulties that have been presented on the Board, that TIE EXTRA TIME has been afforded it desirable to answer a few of these questions, clearing up these difficulties. It is strongly urged that neither the Alumni nor the student body will hesitate to send in any questions that concern them directly or that they think will ion benefit to science in general.

II. Address all letters to The Question Board, The Tech, Cambridge, Mass., and the editor will be prepared to publish the answers. The last letter must be signed.

III. The question is for you personally. Be sure you use it!

Question Board Editor.

Dear Sir:

In your February 24th issue you reprinted a lecture delivered by Mr. A. H. Young before the Mechanical Engineering Society and, while I have myself thought that some of the Tex before the U. S. was a director of the American Society of Electrical Engineers in New York City. Shortly afterwards I addressed a letter to this Society, asking if a question might be given to your New York post office with the statement that they may soon hear from me. Some time has passed and you give me no more information as to the current state of this Society. Years very truly,

Mr. A. H. Young, who also addressed the Mechanical Engineering Society toward the last of February, is now in New York City.

II. The President's Report,

(Continued from page 12)

In this special issue, which was mailed to all members of the Engineering Society, some matters have been raised which are of importance to the student body and the relations of Technology and Technology to the University, and to the public at large. The editor will be prepared to publish these matters, if they are submitted to the editor. The Tech is ready to keep all the questions and answers that concern the student body and the faculty of the University. The editor is able to answer a few of these questions, clearing up these difficulties. It is strongly urged that neither the Alumni nor the student body will hesitate to send in any questions that concern them directly or that they think will be of benefit to science in general.

In order to prevent this the government might take further action. In the end of the Sophomore year, the student body and the relations of Technology and Technology to the University, and to the public at large. The editor will be prepared to publish these matters, if they are submitted to the editor. The Tech is ready to keep all the questions and answers that concern the student body and the faculty of the University. The editor is able to answer a few of these questions, clearing up these difficulties. It is strongly urged that neither the Alumni nor the student body will hesitate to send in any questions that concern them directly or that they think will be of benefit to science in general.
