ANNOUNCEMENT

A series of short practical talks on the application of hydraulic pressure will open this space in THE TECH once each week for fifteen weeks. Essential parts of hydraulic equipment will be illustrated and briefly described and representative hydraulic press shows in that the complete series will give the reader a fairly comprehensive idea of the present development and extensive application of this important branch of hydraulics.

The subject will be handled from the standpoint of the machine shop and factory rather than that of the classroom.

Must read, the basic principles of hydraulic pressure will be briefly represented. Read the complete series. You will find it well worth while.
