THE TECH

Men to Work in Shipyards
(Continued from page 1)
ity of thirteen hundred ships to be completed and supply our army in France. To
supply any number of ships at that rate will not be easy even when the shipbuilding
fleet is on full speed. Why should we Americans suffer when the whole civilized
world is at stake? Surely every one of us is interested in the success of the tech-
nique of our shipbuilders. This is not the time to be pessimistic about
our生产能力. We should do what we can to help.

The question might be raised with a view to the making of some plants which are
not now available in the United States. This is an easy matter and should not
be a source of great anxiety. This is not the time to be pessimistic about our
capacity to do what is necessary. Everyone interested should visit the
site of the new shipbuilding plants.

DULITE

 Saul means

For institutions, colleges, laboratories, dining-
halls, auditoriums, class rooms and everywhere
where good light and plenty of it is required,
Harrison’s Du-Lite is making its way.

It will cut down maintenance cost, fuel bills and
cleaning-time, and increase the speed and
efficiency of the students.

Can be applied to brick, concrete, steel,
plaster, composition wall-board or wood, with equal
effectiveness.

If desired, Harrison’s Du-Lite may be tinted to
just the shade which gives the maximum light
reaction and at the same time rests the eyes,
thus further increasing efficiency.

Harrison Works

Office and Operated by
E. 1. Du Pont De Nemours & Company
50th & Gray’s Ferry Road
Philadelphia.
