The American Society for Technology in Education, 345 East 106th Street, New York, N. Y., issues its annual report for the year 1919, the first since the organization was reorganized. The report is a valuable source of information on the progress of technology in education, and is highly recommended for all educators and interested parties.

The report is divided into five main sections:

1. General Information
2. Technical Education
3. Vocational Education
4. Adult Education
5. Research and Development

Each section provides comprehensive data and analysis on the various aspects of technology in education, including recent developments, trends, and challenges.

The report concludes with a section on the future of technology in education, highlighting the importance of collaboration between educators, policymakers, and industry leaders to ensure continued progress.

In conclusion, the report serves as a valuable resource for anyone interested in the field of technology in education, providing insights and guidance for future developments.
