EXTENSIVE VAIL LIBRARY COLLECTION IS NOW OPEN FOR THE USE OF TECHNOLOGY MEN

$30,000 Treatises Pertaining Chiefly to Electrical Engineering and Mathematics Have Already Been Catalogued

In a message to the members of the Electrical Engineering Department, Mr. William D. Quick, librarian of the Vail Library, said:

"The Vail Library was opened for public use November 1st, 1911. It was opened after careful study and planning. A work of this character, involving the expenditure of many thousands of dollars, the work of many years in collecting the books, and the provision of the necessary equipment of the library, was not undertaken without serious consideration. The members of the department have very earnestly interested themselves in the development of this library.

The collection of books is a very large one. It contains more than 30,000 volumes, and is one of the largest of its kind in the United States. The books are arranged alphabetically in the catalogue, and are also arranged by subject in the various reading rooms. There are several reading rooms in the library, each with a number of reading desks and chairs.

The library is open from 9:00 a.m. to 5:00 p.m. daily. It is open to all, but those who desire to use the books must present a valid library card. The books are available for reading in the library, or for use in the student's own home. The books may be borrowed for a period of one month, and may be renewed for an additional month.

The library is not only a place for the use of books, but it also serves as a center for the study of electrical engineering. The library is equipped with a number of lecture rooms, and a number of lecture series are conducted in the library. The library also serves as a center for the study of electrical engineering, and a number of lecture series are conducted in the library.

The library is open to all, and all are welcome to come and use the books. The library is not only a place for the use of books, but it also serves as a center for the study of electrical engineering. The library is equipped with a number of lecture rooms, and a number of lecture series are conducted in the library. The library also serves as a center for the study of electrical engineering, and a number of lecture series are conducted in the library.
