INDEPENDENCE DAY NUMBER

A Record of Continuous News Service for 36 Years

Independent Day 1918 will dawn upon a new America; not one living for itself as in former years, but one living for the good of the entire world. The individuals within the country are not devoting their energies for their personal benefit, but for the benefit of the noble cause for which their Country and its Allies are fighting. The spirit of the people is appreciated. Tomorrow, King George, in Chelsea, will issue the first half ball of a baseball game between American Soldiers and American Soldiers. By so doing, His Majesty will help to celebrate the historical event by which his country lost its most valuable possessions. Independence Day has taken on a new aspect. It is no longer a day commemorating the triumph of the American Colonies over tyrannical England, but rather the unashamed equality of the right rules of man over the autocratic idea of all for one. The American cause of 1776 is the Allied cause of 1918. It has taken one hundred and forty-two years for the "unkutured" nations of the world to swing over to the idea that there is a chance to throw down in 1776, and are working shoulder to shoulder to sweep from the world the last vestiges of one-man government. We here at the Institute are not working for ourselves, but for Technology; not for Technology, but for America; not for America, but for the Cause of 1776.

INSTITUTE MEN REPORT ON THE NEW "GARABED"

Four Technology Professors on the Committee of Five which Reported Undoubtedly on the Mysterious Invention

ALL INFORMATION KEPT SECRET

Washington, July 3—An unknown report as "Garabed" the mysterious invention which was to take power out of the air to run anything from a siren to a battleship, was submitted to the Interior Department by the committee of six scientists which onward the intention at Boston meanwhile, the approval of Congress.

Technology was well represented on the committee which investigated the claims of the patriotic Boston man, as members of the committee are professors in the Navy, navy President of the Massachusetts Institute of Technology, three of them graduates of Technology.

The committee announced its report did not believe the principles of the inventor, Gabriel T. L. Kilkenny, were sound or his idea practical, or that they could result in practical development of free energy.

Evidently the report is...

CLASS OF '88 HAS REUNION

A Record of Continuous News Service for 36 Years

The class of 1888, which includes a number of prominent men in its membership, held a reunion last Friday and Saturday at the New Haven Yale. The class held a banquet Friday night at the Hotel Quadrangle, and Saturday afternoon at the Harvard Club.

The class included the members of the class of 1885, who are the members of the class of 1888. During the week-end following the Harvard Club, a number of members of the class met at the Hotel Quadrangle, and Saturday afternoon an address was made by Dr. T. F. P. Miller, the President of the Massachusetts Institute of Technology, who spoke on "The New Engineering Education." The address was followed by a dinner at the Harvard Club.
