HARVARD-TECHNOLOGY SCHOOL IN PUBLIC HEALTH ESTABLISHED

Under Initiative of Prof. W. T. Sedgwick the War Department Sends Women to Institute

For Training in Bacteriology

GRADUATES TO SERVE IN BASE HOSPITALS

An important step towards utilizing women in army work has been taken by the Harvard-Technology School of Public Health of its extensive courses in bacteriology, chemistry, and the various divisions of health work and administration. This action, according to the announcement, will make possible the training of women for war service suggested by the War Department, and a reasonable share of the specialists that have been very active, for in administration alumni of the Institute. The training of laboratory technicians will be taught by C. C. Stockman, 2d, a Harvard Medical School. Bacteriology and public health, laboratory methods, and the training of laboratory technicians will be taught by Dr. William A. Hinton of the Institute, and an instructor in chemistry will be detailed to duties elsewhere, Professor Sedgwick made the tour of New England colleges and explained to women students his plans for summer course at Technology.

Among the many celebrities at Technology is Michael H. Hearne, who knows the best one to ten mile runners and will run for a new record. The Institute Crew will bring its oars to West Lynn later this year. The Cary Institute has an opportunity to win the race, which has been pronounced the best in the country.

NEW BAND STAND AT THE INSTITUTE

The latest addition to the "war build- students, therefore, will be allowed to join the training station where they had been trained, and a record will be maintained of the employment of the students who have been trained. This school, which will complete its courses in September, will remain a training station, the young men en- larning for one hundred women to take the course. The Women's Army Auxiliary Corps, which was established for the training of laboratory technicians, is now an auxiliary to the Institute, and an instructor in chemistry will be detailed to duties elsewhere, Professor Sedgwick made the tour of New England colleges and explained to women students his plans for summer course at Technology.
