It is with regret that we announce the resignation of Donald D.

In addition to the hard work which he had done for THE TECH, Mr. Way has engaged in several other activities. He was a prominent member of the Institute Committee and it is well known that he was the Vice-Chairman of the Committee on Shipyard Employment.

We hear that a large percentage of men from training stations have been dismissed from the Navy because of chronic nervousness. The Navy never worries over this. A trip in a flivver over the wayy tar road in front of the buildings would determine once and for all a man's susceptibility to "mal de mer" and would serve an admirable seascickness test for applicants.

We were not worried over the possibility of air attacks until we heard that antiaircraft guns were to be mounted in the Public Gardens. Somebody is always taking the joy out of life.
