Annex Supplements Walker Memorial Aviation Barracks

AFTER turning the Walker Memorial into a barracks and adjourning the Alumni's meeting and taking over the Tech block for use as a Receiving Ship, the Technology School was still in need of more room and quarter the ever increasing numbers of men. This demand was met with the construction of a new barracks which is located on the Institute grounds behind the Avenue Street back of the Walker Memorial and along the east side of the Service Building. This building is a wooden structure one hundred sixty-three by forty-three feet. The standard nine for three terraces accommodating two hundred men. It is furnished with one hundred double deck beds, the same as are used at the Walker Memorial and the Receiving Ship. The plans have been made such that other barracks may be erected if necessary.

3285 MEN IN SERVICE

NAVAL AVIATION STUDENTS HURT

Two naval aviation students were hurt in an accident at the Naval Station at Middletown, Conn., today. The accident occurred when a naval aircraft was taking off at the Naval Station. The students were hurt in the accident and were taken to the hospital for treatment. The Naval Station is located on the outskirts of the city and is a popular location for naval aviation training.

LEUTENANT BUGH IN CALLED ACTIVE COAST DEFENSE

Lieutenant Bugh, who has been investigating the Technology R. O. T. C. program and the weather, and took Major Cohn's place as the head of the Department of Meteorology, arrived at the War Department, where he was called to active coast defense. He was summoned to report to the commanding officer at Fort Wadsworth. The Weather Department has been tasking an extraordinary amount of work of making preparations for sending some of the students in the Polytechnic Camp, he has been called to active defense. There is a great shortage of officers in the Weather Department and the Weather Department has been called to active defense.
