Spies and Lies

German agents are everywhere, eager to gather scraps of news from our men, our ships, our munitions. It is still possible to get such information through Germany, where thousands of these agents—often individually harmless—are patiently gathered into a whole which spells death to American soldiers and danger to American homes.

But while the enemy is invidious in trying to collect information, and his systems elaborate, he is not superhuman—indeed, he is often very stupid, and would fail to get what we want if we were not deliberately handed to him by the carelessness of American citizens.

* Do not discuss in public, or with strangers, any news of Germany's plans, or your own military preparations, which come into your possession.
* Do not permit your friends to be in service to tell you—write to write to write to write about it, what they are doing and where.
* Be on the watch for the pickle barrel, which is not an exactly subtle plan. Remember to add a note of similar character to letters of any kind of business.

THE TECH

ARMS CABLE FABRICATED FOR TRANSCONTINENTAL FLIGHT

The Aerial Club of America announced July 6 that it had wired the Navy Department, according to the announcement of Charles Fred

eric, A. HALL

was flying from New York to London. That it was willing to assume the responsibility of the 3,000-mile transcontinental flight, in order to assist the government in the prosecution of the war, and to enable thousands of airplane owners and enthusiasts to work to the maximum extent toward the complete development of the American aviation division.

Among the news announced by the Aerial Club of America was the fact that it had given a report to the Department of War, that it was willing to assume the responsibility of the 3,000-mile transcontinental flight, in order to assist the government in the prosecution of the war, and to enable thousands of airplane owners and enthusiasts to work to the maximum extent toward the complete development of the American aviation division.
