$2521.61

BISHOP TELLS OF ENGINEERS

(Compiled from page 1)

I wish to express my appreciation of the generous hospitality extended to me while I was in Russia. My visit, however, was not due to any special invitation, but instead, it was the result of my own desire to see what was happening in Russia and to form my own judgment of the situation.

When I arrived in Russia, I was greeted by the friendly and hospitable people who welcomed me with open arms. I was impressed by the spirit of cooperation and unity that characterized Russian society.

Despite the difficult conditions, the people of Russia were determined to build a better future for themselves. They were willing to work hard and sacrifice in order to achieve their goals.

I was also impressed by the beauty of Russia. The natural landscapes, the rich cultural heritage, and the vibrant cities all contributed to the unique character of the country.

I believe that the people of Russia are capable of overcoming their current challenges and building a brighter tomorrow. It is important for the international community to support their efforts and to work together towards a shared future.
