PROVIDENCE, R. I.

CLARK INDUSTRY HANDICAPPED

The destructive effect of the war upon the domestic industries of Britain and France, and the shutting off of essential goods from Germany, have seriously affected the American industries, especially chemical and lumber interests. The American industries, at the present time are not receiving the amount of the orders that they are making, and the present position is one of general depression throughout the United States in these lines. The outlook for the future is very uncertain, and the whole situation is one of much concern.

GROWTH OF UNIFORMS

In order to obtain its surplus of oil the United States has been forced to purchase large quantities of foreign products. The oil shale industry is now at a standstill, and the Government has been forced to increase the production of domestic supplies.

Jordan Marsh Company

Exclusive Agents for Society Brand Cloth Dresses in Boston

The war news from the eastern front these days is bad news for the German people. All over the land, in every city and town, the people are in despair. The newspapers are filled with stories of the defeats of their armies in the field. The soldiers are being drafted in great numbers, and the Government is trying to find more men to fight for Germany.

THE LIBERTY LOAN

The Liberty Loan bond buyers of the preceding loans have their share in the work of the Government, and the war is as impossible as it is. The soldiers and of our industrial and business interests are doing all they can to support the war effort. This is the main reason why the American people are asked to lend money to finance the war.

WHAT WE FIGHT FOR

The high aim of America and her allies is to uphold President Wilson's greetings to France and Germany.

"As France celebrated its Fourth of July, so we rededicate our Fourteenth, laboriously concurred of a neighborhood of men and of purpose of which we are deeply proud. The sea seems very far away. Today France, France and America are farthest from the life line. But the war is being fought, and the war is not for nothing."

STEAM AND LEADING

Sir William Gosse, of the British Food Board, states that from 1,540,000,000 pounds of petroileum the American manufacturers are able to send the Germans some more bad news for money; they know it's vital value in this war to save their lives. The Germans have more strength.

CUTS OIL DEMANDS ARE BEING MET BY THE WEST

With the demand for gasoline and oil for military purposes, the price of these products is going up. The Government is trying to find more money to finance the war.

ARE WE MAKING THE MOST OF OUR RESOURCES?

Let the non-essentials wait until the war is over. It is time to think of our nation's future.

WHAT WE AREachiEving

The Government is making every effort to save all the resources of the country. The soldiers are being supplied with the best possible equipment, and the Government is trying to find more men to fight for America.
